

V7 Modify a Tune File

EFILive Support - 2020-07-13 - Comments (0) - V7 Software

1. Connect **FlashScan V2** or **FlashScan V1** to your PC.
2. Open the **EFILive V7.5 Tune Tool** application.
3. Navigate to the **File->Open tuning file** menu option, or click the **File Open** button.
4. Navigate to the location on your PC where your tune file is saved and select **Open**.
5. Navigate to the table(s) you wish to modify by using the navigation window or entering the table number into the **Search** box.

6. Navigate to the **File** menu option and select the **Save tuning file, Save tuning file as...** or **Save tuning file, for AutoCal** option.
7. Name your modified tuning file and select **Save**.
