

Error Codes

2020-08-26 - EFILive Support - Comments (0) - General

Error codes occur for a variety of reasons. EFILive interacts with many different components along the supply chain from software installation, to hardware integration and of course vehicle connection. Each individual connection needs to work harmoniously to deliver the end result.

Because of the vast array of interactions, when users are faced with an error code it is critical to understand which error code you are receiving. A description isn't necessary, but the Error Code number is essential.

Error Codes, their description and suggested remedies are available in the following locations:

- EFILive V8 Scan and Tune Software, navigate to [F8: Tools] -> [F8: Lookup Errors] and enter your code into the lookup.
- EFILive V8 Scan and Tune Software; navigate to Help -> Documents -> EFILive Error Codes.pdf
- [EFILive Error Codes.pdf](#) on the EFILive website.
- [EFILive Error Code List](#) on the EFILive Service Desk.
